

Detailed and vibrant original image.

A highly detailed print on clothing will lose brightness and details.

Ideal for illustrations containing colour gradients or complex details, such as photographs.

Expect to lose details compared to the computer screen rendering.

RECOMMENDATIONS

- Provide a high-resolution logo (clear background 300-600 dpi .psd) to ensure high-quality printing.
- Avoid illustrations containing small lettering or fine details.
- Choose light-coloured and fine gauge jersey clothing for optimum results and a softer feel.
- Printing on a dark garment requires discharge and/or a white background, and will not be as soft to the touch.
- Consider process printing for logos of 8 colours or more and for orders of 75+ units, in order to obtain the best value for your money.

LIMITATIONS

- Same logo, same order, variable results. The smaller the order quantity, the more colour variations there will be between each garment.
- Fabric surfaces are imperfect and halftone dots very small. Therefore, some dots can fall between the threads and create visible imperfections.
- Attraction reserves the right to refuse to produce certain process printed logos.
- We cannot guarantee exact Pantone colours.

This technique is only available on jersey fabric
